YEFF Deliverable 5.3:

Website extension for photo competitions

Project: YEFF – Young Energy Efficiency

The sole responsibility for the content of the websites lies with the authors. It does not necessarily reflect the opinion of the European Union. Neither the EASME nor the European Commission are responsible for any use that may be made of the information contained therein.

INTRODUCTION

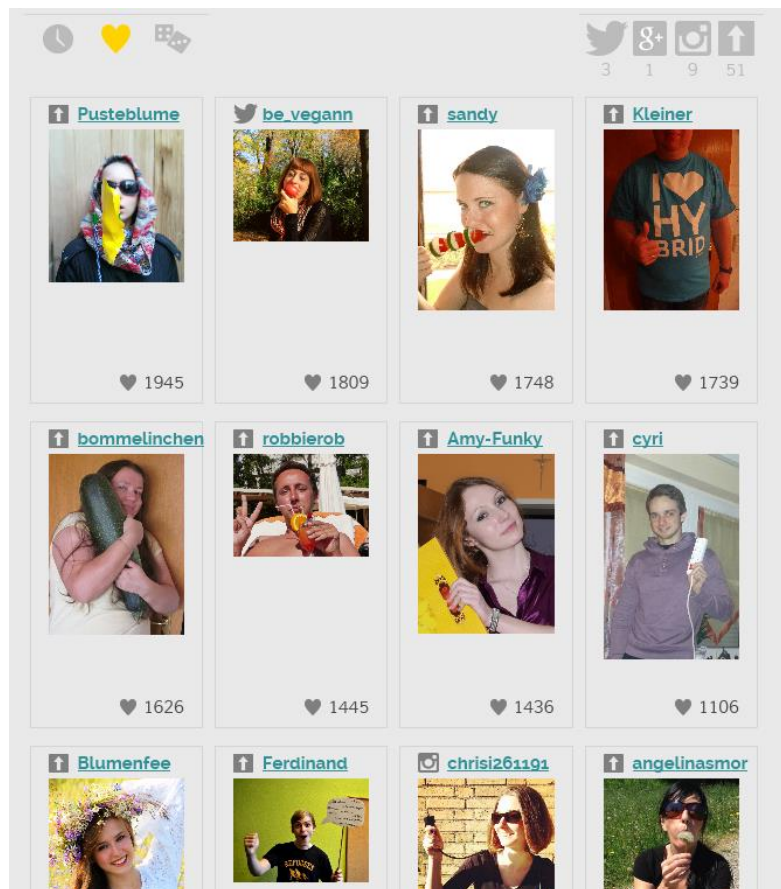

In this deliverable there was a TYPO3 plugin programmed that can be used to create photo contests on a specific topic with the help of the social networks Instagram, Twitter and Google+.

FEATURE OF THE PLUGIN

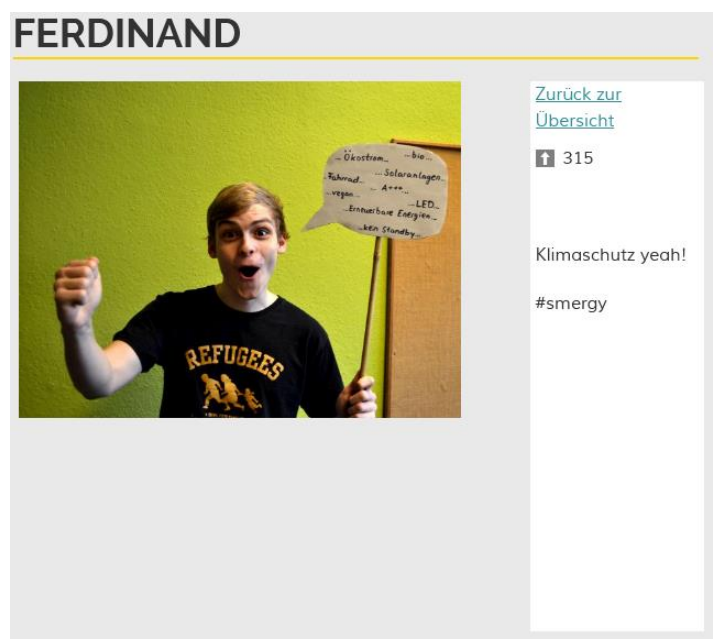

The plugin has the following feature:

- Collecting photos from social networks (twitter, Instagram, Google+) that are marked with a specific hashtag
- Collecting “likes” of the collected photos and show them on the website
- User can upload photos directly on the website, they have to give their e-mail address and have to confirm it before the photo is visible
- Show a list of photos that are part of the competition, the list can be sorted on likes, dates or can be displayed randomly
- Show the details of the collected photos like: username, description and the number of likes of the photo
- The plugin can be used on several websites at the same time and shows everywhere the same information, so it's possible to create a contest all about Europe
- On the other hand the plugin can be used to create different contests on the same time on different websites
- Some administrative features like deleting pictures and see some statistic data

SCREENSHOTS

1: Overview about the collected posts
